## CARE OF TROPHIES

**SMALL ANIMALS** - Coyote or smaller FREEZE whole - Don't gut or skin animal. Freeze as soon as possible.

**Birds** - Protect the feathers as best as you can. Carry a pair of panty hose or stockings in your hunting bag & drop bird in head first down leg. This will hold feathers in place, wrap in newspaper and freeze.

**Fish** - DON'T gut fish - Ice down as soon as caught. Wrap in wet cloth or newspaper, place in plastic bag and freeze.

Cut skin completely around front legs,  
 3" to 4" from shoulder. Then cut through  
 arm pits to your original incision.  
 (see sketch)

After skinning and rolling cap forward to  
 ears, cut neck completely off (see sketch).  
 Do not attempt to skin head! Freeze  
 immediately if possible; if not, keep  
 on ice and rush to taxidermist!

**CUSTOMERS** take care to secure and protect your specimen afield. It will enhance our ability to produce a quality mount for you.

**TAXIDERMY** is an art and a seasonal business. Your mount often requires several months to complete. Your patience is appreciated.
